A Tradition of Excellence

Port Moody Robotics – Team #7781
Port Moody Secondary School
School District 43, Coquitlam

Dear potential sponsor,

We are members of the robotics team at Port Moody Secondary School. Last year, for the first time, our team competed in the Canadian Pacific Regional in Victoria, BC. We finished in 10th out of 35 teams thanks to our dedicated members and amazing sponsors.

FIRST Robotics is a team-based, international robotics program that challenges high school students to a season of designing, building and programming a robot according to a series of task requirements released in January each year. The robot is then taken to compete with and against other robots in a game-like scenario where teams try to score points through completing the tasks. Last season was our rookie year of competition and despite being the least experienced team at regionals, we worked our way into the final playoffs and led our very own alliance!

Our team provides a huge opportunity for students to develop creative thinking, problem-solving and teamwork skills as they need to find innovative and effective solutions to deal with the tasks at hand. The learning opportunities are not only in building and coding, but also in business, management and design. Overall, members of our club are gaining experience in variety of fields that will be valuable to them when they graduate from high school.

We are hoping that you would like to join our team as a sponsor this season to assist with our operating costs and competition fees. This year we have four levels of sponsorship available to you. Please review and we thank you for your time.

Sincerely,

Tyler Olinyk (teacher sponsor) & the PMSS Robotics Team
